ICTS UK, which has invested considerably in recent years introducing various canine search capabilities to its portfolio, has officially launched its new canine search division ICTS - GIS, based at the Milton Park Business Park in Didcot, with a new kennel complex and aviation cargo screening facility also constructed on the site. All the dogs are trained to sniff out drugs or explosives.

Alertness of ICTS employee leads to impressive detection

At one of the stations where ICTS Europe provides security services, an unusual concealment containing a sum of money was discovered. The suspicion of the ICTS employee, a passenger checkpoint X-ray operator, was aroused by an atypical organic mass. The item was a spray can that had been altered as follows: its spray top was removed, the can top cut off to allow access to the can's interior, and the cash was then wrapped around a plastic tube. Although in this case the concealment was used for cash, such an item has the potential to be used for an IED as well.

ICTS Europe Systems takes part in AirporTech Asia 2008 Exhibition

ICTS Europe Systems participated actively in and was one of the main sponsors of this exhibition, which was held in **Shanghai** on June 17-18.
